BEA 10-29

State Personal Income: First Quarter 2010

State personal income growth averaged 0.9 percent in the first quarter of 2010 up from 0.5 percent in the fourth quarter of 2009, according to estimates released today by the U.S. Bureau of Economic Analysis. Personal income increased in all but two states with growth ranging from 1.6 percent in Mississippi to -2.0 percent in North Dakota. Inflation, as measured by the national price index for personal consumption expenditures, declined to 0.4 percent in the first quarter from 0.6 percent in the fourth quarter.¹

NOTE.—Quarter-to-quarter percent changes are calculated from unrounded data and are not annualized. Quarterly estimates are expressed at seasonally adjusted annual rates, unless otherwise specified. Quarter-to-quarter dollar changes are differences between published estimates.

¹ Calculated from the price indexes in Table 6 of the May 27, 2010 BEA News Release, *Gross Domestic Product: First Quarter 2010 (Second Estimate)*.

This news release is available on BEA's Web site at www.bea.gov/newsreleases/rels.htm.

Net earnings grew 0.7 percent in the first quarter. For the U.S and twenty states, net earnings grew at the fastest pace since the recession began (in the fourth quarter of 2007).

Transfer receipts grew 3.0 percent. American Recovery and Reinvestment Act (ARRA) transfer receipts rose to \$113.5 billion in the first quarter and contributed 0.1 percent to U.S. personal income growth. There were small declines in ARRA payments in some states while in other states the increases were substantial. In Mississippi, 0.7 percentage point of first quarter personal income growth (almost half) is attributable to rising ARRA payments (estimates for all states are available at <http://www.bea.gov/regional/pdf/ARRA.pdf>).

Property income fell 0.4 percent nationally in the first quarter as declines in dividends offset rises in interest and rental income. Property income fell the most in Wyoming, 1.2 percent, reflecting the relatively high share of dividends in that state's property income. Property income rose 1.0 percent in Louisiana, boosted by an increase in homeowner assistance payments related to Hurricane Katrina. (These payments are treated as a component of the rental income of persons.)

Earnings by industry. The industry making the largest contribution to first-quarter personal income growth nationally was health care. The administrative and waste management industry and the military made the next largest contributions. The military received a 3.4 percent pay raise in the first quarter while federal civilian workers received an average 2.0 percent increase. Construction and real estate earnings continued to fall.

Farming contributed more than one-third of earnings growth in Kansas, the state where earnings grew the most the first quarter: 1.9 percent. At the same time farming accounted for all of the earnings decline in North Dakota, the state where earnings fell the most: 2.5 percent. The different performance of farming in the two states reflects the relative importance of earnings from livestock operations (which grew) and from crops, particularly wheat (which declined).

Quick links to all of the regional statistics underlying this news release along with mapping and charting software and a detailed methodology are available at <http://www.bea.gov/regional/quick.cfm>.

Definitions

Personal income is the income received by all persons from all sources. Personal income is the sum of net earnings by place of residence, property income, and personal current transfer receipts. **Property income** is rental income of persons, personal dividend income, and personal interest income. **Net earnings** is earnings by place of work (the sum of wage and salary disbursements, supplements to wages and salaries, and proprietors' income) less contributions for government social insurance, plus an adjustment to convert earnings by place of work to a place-of-residence basis. Personal income is measured before the deduction of personal income taxes and other personal taxes and is reported in current dollars (no adjustment is made for price changes).

The estimate of personal income in the United States is derived as the sum of the state estimates; it differs from the estimate of personal income in the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.

BEA groups all 50 states and the District of Columbia into eight distinct regions for purposes of data collection and analysis: **New England** (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont); **Mideast** (Delaware, District of Columbia, Maryland, New Jersey, New York, and Pennsylvania); **Great Lakes** (Illinois, Indiana, Michigan, Ohio, and Wisconsin); **Plains** (Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota); **Southeast** (Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia); **Southwest** (Arizona, New Mexico, Oklahoma, and Texas); **Rocky Mountain** (Colorado, Idaho, Montana, Utah, and Wyoming); and **Far West** (Alaska, California, Hawaii, Nevada, Oregon, and Washington).

BEA's national, international, regional, and industry estimates; the *Survey of Current Business*; and BEA news releases are available without charge on BEA's Web site at www.bea.gov. By visiting the site, you can also subscribe to receive free e-mail summaries of BEA releases and announcements.

* * *

Next state personal income release – September 20, 2010, at 8:30 A.M. ET for state personal income, second quarter 2010.

1. Net earnings is earnings by place of work--the sum of wage and salary disbursements, supplements to wages and salaries, and proprietors' income--less contributions for government social insurance plus an adjustment to convert earnings by place of work to a place-of-residence basis.

2. Percent changes are expressed at quarterly rates.

Note: Estimates may not add to totals because of rounding.

Source: U.S. Bureau of Economic Analysis

Table 3. Contributions to Percent Change in Personal Income, by State and Region, 2009:IV-2010:I/1

[Percentage points, seasonally adjusted]

	Percent change in personal income	Net earnings						Dividends, interest, and rent	Personal current transfer receipts	
		Earnings by place of work				Contributions for government social insurance	Residence adjustment		Excluding state unemployment insurance	State unemployment insurance
		Wage and salary disbursements	Employer contributions for		Proprietors' income					
Employee pension and insurance funds	Government social insurance
